

# GERMAN TIGER SIMULATION TANK

## INSTRUCTION

AGES 6+

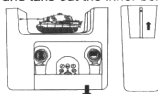

### ITEM NO. 2203

NAME OF PRODUCT: German Tiger simulation tank  
PRODUCT FEATURES:

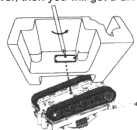

Playing time: 10-15 minutes (equipped with large capacity battery: 3.7V 110mAh lipo battery)  
Remote control distance: ≥20 meters;  
Better function: using abrasion resistant simulation tank chain which increase the speed and enhance the sensitiveness of movement.  
Great performance: reliable frequency selection and strong anti-interference ability.

### PREPARATION

1. Remove the package and take out the inner box
2. Take out the transmitter and antenna

3. Using a phillips screwdriver to unscrew the base cover, then you will get a unique rc tank.

4. Insert the antenna into the transmitter and tighten it.

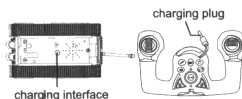

5. Open the battery cover, insert 4X1.5V AA battery with correct polarity and close the battery cover.

### CHARGING

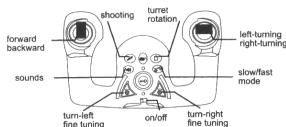

Open the transparent cover and pull out the charging plug, insert the charging plug into the charging interface on the bottom of the tank, you will see the charging indicator lighting up, after 20-30 minutes, charging indicator will be off which mean the tank is fully recharged, at the end, please pull out the charging plug.

### OPERATION

1. turn the power switch on the tank and on the transmitter to "ON" position the antenna when playing (meanwhile you will hear sounds from the tank)
2. when press the "fast/slow mode" button, the tank will switch between high and low speed.
3. press the "forward" or "backward" button, the tank will go forward or backward, meanwhile interval click the "left-turning" or "right-turning" button will change the running direction of the tank (when using this function, tank will send out running sounds)
4. press the "left-turning" button or "right turning" button, the tank will spin around clockwise or anticlockwise
5. press the "forward" button and "left-turning" button at the same time, the tank will spin around to the left. Switching between "forward", "backward", "left-turning" and "right-turning" button will make the tank spin around with different direction.

6. press the "turret rotation" button, the tank turret will have a 360-degree rotating, the gun barrel will have aiming function (moving up and down) when the turret rotates. When the tank under static state or moving state, interval click the "turret rotation" button will change the rotation direction of the turret. (meanwhile the turret will send out machinery movement sounds)
7. press the "shooting" button on the transmitter, the tank will have firing projectile sounds and impulsive force dynamic effect.
8. press the "sounds" button will turn on/off the sounds.
9. press the "sounds" button for 3 seconds, tank will automatically demonstrate all functions.
10. the rest 2 buttons (in the middle of the transmitter) are functionless.

### BATTERY SAFTY

01. tank uses 3.7V 110mAh rechargeable lipo battery, transmitter uses 4 \* 1.5V AA non-rechargeable battery.
02. If the tank becomes apparently slow during operation, this may due to insufficient power, please charge the tank as this manual describes.
03. The tank cannot be charged when the transmitter is lack of power, this happens when the transmitter's charging indicator light goes dim or be off, please replace the old batteries.
04. Pay attention to the charging plug and charging interface when you charge the tank
05. When not using the tank for a long period, please remove the battery from the transmitter and turn off the tank.
06. Non-rechargeable battery cannot be charged.
07. Please do not mix with old and new batteries or different type of batteries.
08. Pay attention to the "+", "-" polarity of the battery when installing.
09. Avoid shot circulted by the "+", "-" polarity on the battery.
10. please charge the rechargeable battery under adults' supervision, power terminals cannot be shot circulted
11. Keep this manual for future reference.
12. please check regularly on the battery and transmitter's wire, plug, cover and other parts, if any damage occurs, please stop using until they get fixed.

### BATTERY RECYCLING:

1. Please DO NOT dispose this equipment as daily trash. Damaged or exhausted battery should be put into a special-designed container.
2. This equipment is composed of electronic component and batteries, they belong to electronic trash, please process it by particular requirement.
3. Please be familiar with your local trash processing way.
